## **Moneris Solutions Forms Strategic Partnership With Henry Schein MicroMD**

*Payments and Medical Software Leaders Team to Provide Integrated Payment Solutions to Healthcare Practices*

**Schaumburg, IL—December 18, 2012-** Moneris Solutions, one of North America's largest payment processors, announced today it has formed a strategic partnership with Henry Schein MicroMD, a leading provider of practice management and electronic medical records management software for medical practices and a subsidiary of Henry Schein, Inc., (NASDAQ: HSIC) the world's largest provider of health care products and services to office-based dental, medical and animal health practitioners.

Moneris will integrate its proprietary eSelectPlus payments gateway with encrypted card reader functionality into the upcoming new release of Henry Schein MicroMD's Practice Management (PM) software, enabling Henry Schein MicroMD customers to process patient credit and debit payments directly through their MicroMD PM software. By eliminating the need for a traditional credit card terminal or stand-alone payment system, the new integrated solution will substantially reduce payment processing and equipment costs; the integrated card reader, which encrypts cardholder data before it reaches the Henry Schein MicroMD PM, helps protect patient account information and keep practices within the scope of PCI-DSS compliance. With payment processing functionality built into the overall practice management solution, it will be possible for payment information to be easily moved around the system to patient and accounting ledgers, reducing bookkeeping errors while boosting staff productivity.

Moneris will soon integrate its eSelectPlus gateway into Henry Schein MicroMD's on-line statement presentment and bill-pay solution, enabling Henry Schein MicroMD customers to offer patients the security and convenience of receiving and paying their medical bills electronically.

"It's not often you have the opportunity to partner with a company the caliber of Henry Schein MicroMD", said Chris Lee, President, Strategic Partnerships and Emerging Markets for Moneris Solutions. "The Henry Schein MicroMD name is very well-known throughout the healthcare industry and their solutions are considered best-in-class. We look forward to working with them and bringing secure, affordable integrated payment solutions to their medical practices."

"Moneris Solutions was a natural choice for our payment processing partner", said Bruce Lieberthal, Vice President, General Manager, Henry Schein MicroMD. "They have considerable experience in the healthcare industry and understand the unique needs of medical practices and the business challenges they face. They also have a long, successful history of building, growing and supporting integrated partnerships, which really appealed to us."

The new version of Henry Schein MicroMD PM software with integrated payments along with Henry Schein MicroMD's new online statement presentment and bill pay solutions are both scheduled for release in early January 2013.
