SAN ANTONIO GASTROENTEROLOGY ASSOCIATES IMPLEMENTS LATEST HENRY SCHEIN MICROMD® PM AND EMR SOFTWARE

Multi-location group practice to utilize integrated EMR and PM software to improve office efficiency and quality of care

Boardman, Ohio – April 12, 2012 – Henry Schein MicroMD®, a provider of proven and cost-effective practice management (PM) and electronic medical records (EMR) systems and subsidiary of Henry Schein, Inc. (NASDAQ: HSIC), the largest provider of health care products and services to dental, medical and animal health office-based practitioners, announced today that San Antonio Gastroenterology Associates (SAGA) is implementing MicroMD PM + EMR version 7.6 at its 11 Texas-based locations, representing 12 providers and five physician assistants. The implementation of MicroMD is scheduled to go live at the end of April.

A user since 2008 of Henry Schein MicroMD's original entry-level clinical offering, MicroMD EMR *Easy*, SAGA was able to take advantage of the key benefits found in a traditional EMR system without having to go through a full-scale implementation. Having realized the benefits of a comprehensive platform, SAGA is upgrading to the full-featured, integrated MicroMD PM + EMR system that offers a more in-depth support and training experience, as well as incorporates additional functionalities to assist providers in meeting often-changing compliance regulations. These include Health Insurance Portability and Accountability Act (HIPAA) 5010 electronic data interchange (EDI) standards for electronic health transactions and the new ICD-10 diagnostic coding system implemented by the World Health Organization (WHO) in 1993 to replace the current ICD-9 diagnostic code set.

“Long gone are the days of running paper charts to and from our locations,” says Deborah Alvarez, Office Administrator for San Antonio Gastroenterology Associates. “We believe this step is vital in improving our efficiency and providing the highest level of quality care to SAGA patients. The integrated system will also strengthen our efforts to meet the growing list of meaningful use requirements.”

Henry Schein MicroMD, serving more than 14,000 physicians in primary care, major medical and surgical specialties, recently launched its ONC-ATCB 2011/2012 certified EMR and PM version 7.6 at the 2012 HIMSS conference. The software offers practices the latest functionalities, including the export and receipt of comprehensive 5010 files for electronic claims submission and the ability to achieve meaningful use to secure available EMR incentives.

“With ICD-10 and Stage 2 meaningful use quickly approaching, our clients are looking to us for continued support and guidance in meeting current and future federal mandates,” says Keith Slater, Vice President and General Manager for Henry Schein MicroMD. “We are thrilled to be working with San Antonio Gastroenterology Associates as they continuously strive to improve workflow efficiency, while keeping quality patient care at the forefront by leveraging our available technologies and services.”

About MicroMD

The Henry Schein MicroMD brand of practice solutions encompasses simple yet powerful electronic medical records and practice management software that help facilitate the delivery of superior patient care; automate incentive and quality reporting activities; and streamline operations for today’s busy providers. Full-featured, time-tested and budget-friendly, the MicroMD CCHIT-certified, award-winning software helps small practices, large medical groups, community health centers and billing services accelerate progress towards a paperless environment and health information exchange with minimal disruption and stress. High client retention rates attest to its market-leading presence and client-centric focus. Visit us at www.micromd.com or call 1-800-624-8832.
