HENRY SCHEIN MICROMD® EMR VERSION 7.5 PROVIDES COMPREHENSIVE, EASY-TO-DEPLOY SOLUTION FOR DEMONSTRATING “MEANINGFUL USE”

System features at-a-glance graphical tools to help users track and report on “meaningful use” compliance; qualify for financial payment incentives

Melville, N.Y. – July 28, 2011 – Henry Schein MicroMD®, a provider of proven and cost-effective practice management (PM) and electronic medical records (EMR) systems, announced today the release of its new MicroMD EMR Version 7.5. MicroMD EMR Version 7.5 provides the comprehensive features and functionality required by eligible health care providers to fully comply with the meaningful use requirements established by the ARRA’s (American Recovery and Reinvestment Act’s) HITECH (Health Information Technology for Economic and Clinical Health) Act and secure financial reimbursements through the Centers for Medicare and Medicaid (CMS) EHR Incentive Program.

MicroMD Version 7.5 provides users with a flexible, easy-to-use solution for transitioning paper-based workflow into electronic medical records which improve patient care and reduce administrative overhead and operating costs. The system’s built-in features speed access to patient files and streamline the transmission of medical records to other health care professionals. User-customizable tools make it easy for providers to track compliance with “meaningful use” objectives and clinical quality measures that enable them to qualify for financial payments available through Stage 1 of the CMS EHR Incentive Program.

“The system’s built-in alerts and reporting features simplify the process of achieving meaningful use by continually displaying where the practice stands in meeting the government’s current requirements,” said Don Quackenbush, Director, Product Management for MicroMD. “MicroMD will closely monitor the forthcoming Stage 2 requirements and beyond to ensure that we’re programming the software to meet any new criteria that is established. This will enable us to offer our clients a forward path for continual compliance and the ability to obtain additional incentive payments as new requirements are issued.”

MicroMD EMR 7.5 fully integrates with the company’s practice management (PM) solution and patient self-service portal and meets established electronic CCD (Continuity of Care Document) and CCR (Continuity of Care Record) protocols. Seamless integration with MicroMD’s 7.5 PM system enables practitioners to standardize on a single, robust solution for both their practice management and electronic medical records needs. Newly-updated, MicroMD PM Version 7.5 features over 40 customer-requested

-more-

enhancements to add versatility and flexibility. This includes the addition of two new clearinghouse partners – ECP and Gateway EDI-- to offer practitioners an even broader range of vendor choices for insurance eligibility determination, electronic data interchange for claims processing and electronic remittance advice.

MicroMD EMR 7.5 additionally offers patients access to their health information online through the use of the MicroMD Patient Portal. The Patient Portal facilitates secure, on-line communications between patient and provider. Patients can complete medical forms, send messages and view lab and diagnostic results on-line, without having to visit the practice or call the office.

“There are many challenges to overcome in implementing an EMR system, let alone demonstrate meaningful use,” said Keith Slater, Vice President and General Manager of Henry Schein MicroMD. “We have taken every conceivable measure to assure that our system offers the best combination of functionality and value for our clients. We’re committed to continually enhancing MicroMD EMR so that providers have the meaningful use tools needed to secure incentive reimbursements, as well as to make the client implementation experience as streamlined and painless as possible.

MicroMD EMR Version 7.5 attained ONC-ATCB 2011/2012 Complete EHR certification on February 16, 2011 through the Certification Commission for Health Information Technology (CCHIT), a U.S. Office of the National Coordinator - Authorized Testing and Certification Body (ONC-ATCB), in accordance with the applicable Eligible Provider certification criteria adopted by the U.S. Secretary of Health and Human Services (HHS)*. MicroMD supports Version 7.5 with extensive system training, including on-site, hands-on training and self-paced modules customers can choose to implement on their own schedule.

About MicroMD

The Henry Schein MicroMD brand of practice solutions encompasses simple yet powerful electronic medical records and practice management software that help facilitate the delivery of superior patient care; automate incentive and quality reporting activities; and streamline operations for today’s busy providers. Full-featured, time-tested and budget-friendly, the MicroMD ONC-ATCB certified, award-winning software helps small practices, large medical groups, community health centers and billing services accelerate progress towards a paperless environment and health information exchange with minimal disruption and stress. High client retention rates attest to its market-leading presence and client-centric focus. For more information, visit www.micromd.com or call 1-330-758-8832 x 133.
