

## NEWS RELEASE

Henry Schein, Inc. • 135 Duryea Road • Melville, New York 11747

### **FOR IMMEDIATE RELEASE**

#### **HENRY SCHEIN MEDICAL SYSTEMS LAUNCHES MICROMD VERSION 12 PRACTICE MANAGEMENT AND ELECTRONIC MEDICAL RECORDS SOFTWARE**

##### **New Software Updates Improve Practice Efficiency for Medical Practitioners and Provides Enhanced Convenience to Achieve Patient Satisfaction**

**MELVILLE, N.Y. April 28, 2016--** Henry Schein Medical Systems, Inc., a subsidiary of Henry Schein, Inc., announced today the availability of its Henry Schein MicroMD Version 12 software for office-based medical practitioners. The new software features upgrades designed to help physicians operate more efficient and productive practices, while also helping to improve patient satisfaction.

MicroMD Version 12 features electronic prior authorization for prescriptions (ePA), which reduces the administrative burden of manually entering prescription information, and securely notifies providers of medication prior authorizations (PA) requirements. The new software also features a face-to-face appointment tracker, allowing physicians to measure exactly how much time is spent with patients so that more accurate coding can be achieved. Group charting is available as well, helping to improve efficiency in the practice by having the ability to document multiple patients whose encounters all began at the same time. This new feature simplifies group therapy session documentation.

“MicroMD’s new features help enhance the efficiency and productivity of the medical team, enabling patients to get in and out of the practice faster so that more patients can be seen,” said Heather Ansell, General Manager, Henry Schein Medical Systems of the new version of MicroMD. “The features we implemented are a direct result of customer feedback. Their active participation in the design, testing and deployment of this new release has been invaluable.”

Additional upgrades include improvements to phone messaging systems that enable office administrators to track the history of phone calls from recipients, and Credit Card on File (CCOF) technology that features a new ePayments option for storing credit card information so that patients no longer need to provide this information at every visit. The ePayments feature also integrates with the Payment Planning Module, enabling the practice to automatically bill credit cards that are on file, as well as gives practices the ability to set up a credit card payment plan for patients who have outstanding charges, or create a plan for a specific recurring dollar amount.
