

FOR IMMEDIATE RELEASE

SURESCRIPTS CONTINUES TO BUILD CLINICAL NETWORK WITH THE ADDITION OF NEARLY TWO DOZEN EHR VENDORS

ARLINGTON, Va. – January 13, 2014 – In the past year, dozens of electronic health records (EHR) software vendors have selected Surescripts' nationwide clinical network to facilitate efficient and secure health information exchange. These EHR software vendors include Adaptamed, AssistRx, Bizmatics, ChartLogic, ClinixMD, CureMD, ScriptSure by Daw Systems, GeniusDoc, gloStream, HealthFusion, Henry Schein MicroMD®, Medical Office Technologies, Intelligent Medical Software (IMS by Meditab Software, Inc.), Merge Healthcare, OA Systems, PatientPoint®, SRSsoft, STI Computer, and SuccessEHS, among others.

“As a trusted partner to many of these EHR vendors, we continue to make significant progress towards breaking down costly communication barriers among care providers,” said Harry Totonis, president and chief executive officer of Surescripts. “The Surescripts network provides connected EHRs and their rapidly growing contracted base the scale they need to connect care providers within a community and across the country.”

Surescripts clinical messaging allows patient-specific protected health information to be instantaneously and securely transmitted between healthcare providers, leading to increased efficiency, informed care decisions, better patient outcomes, and lower healthcare costs. Users of these EHR systems will be able to easily connect to the Surescripts network to enable clinical messaging capabilities as part of their efforts to meet new healthcare industry standards, including Meaningful Use stage 2.

“When looking to form a strategic partnership to support Merge’s new [iConnect® Network](#), it was critical for us to find an industry-leading organization that is well positioned to support the growth of radiology,” said Justin Dearborn, CEO of Merge Healthcare. “With Surescripts, now hospitals, providers and imaging centers can leverage an advanced imaging network to seamlessly exchange imaging information electronically with their community physicians and deliver reports directly into their EHR. This simple solution allows our customers to meet Meaningful Use Stage 2 regulatory requirements, increase their referral business and enhance their overall financial performance.”

These EHR vendors represent a broad range of solutions serving clinical users in a variety of markets, including healthcare providers in ambulatory and acute hospitals, specialty pharmacies, medical labs, small and mid-sized physician practices, dental practices, and specialty practices ranging from nephrology to veterinarian medicine.

Over the course of the past 12 years, Surescripts has built a trusted network to facilitate the exchange of a wide range of comprehensive health information. Surescripts is a founding member of DirectTrust and recently received full accreditation from the Direct Trusted Agent Accreditation Program (DTAAP), an accreditation program for health information service

providers (HISPs). DTAAP is offered on a voluntary basis by DirectTrust, an independent non-profit association dedicated to securing the exchange of health information between providers and patients.

About Surescripts

Surescripts operates a national clinical network that connects pharmacies, payers, pharmacy benefit managers, physicians, hospitals, integrated delivery networks, health information exchanges and health technology firms to enable the efficient and secure exchange of health information. Guided by the principles of neutrality, transparency, physician and patient choice, open standards, collaboration and privacy, Surescripts provides information for routine, recurring and emergency care. Together with our network participants, Surescripts is committed to saving lives, improving efficiency and reducing the cost of health care for all.
