- Complete patient journey
- Online Scheduling
- Reminders
- 2 way texting
- Digital Patient Intake
- Contactless Payments
- Post Visit Survey

Patient self-scheduling

Convenient for your patient, less phone calls for your staff

83% of patients say they prefer a doctor who offers online appointments. Keep your schedule full by allowing patients to find and book available appointments at their convenience and in real time directly from your website. This powerful tool allows you to qualify patients using logic-based questions so your patients can only schedule with the appropriate provider at the appropriate time - just like your front office staff would do over the phone.

Automated appointment reminders & confirmations

Engage your patients effectively

Did you know that with a dynamic and automated text and email reminders/confirmation system, you can reduce no-shows by up to 45%? Experience practice branded, bi-directional text communications with a 92% engagement rate.

Digital patient intake & check-in

Go fully paperless

Get 85% or more patients fully registered before they arrive. Build customizable and adaptable workflow solutions for a variety of appointment types, which easily can be imported into your chart.

- Collect patient verification, registration, and insurance information, histories, reconcile and import changes into the chart.
- Upload ID and insurance cards
- Gather medical information from allergies and medications
- Signed consents
- Customized questions
- Collect co-pay and balance due

Customize Your Solution
